† Prices are per share not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF JULY.

On the Stock Exchange and in financial circles July proved on the whole a dull month. There was a natural anxiety as to the probable future of money, prompted by the rather unlooked-for developments in the money and foreign exchange markets the previous month. Then too, as is usual at this season, there was a desire to wait and gain more definite assurances as to the prospects for the growing crops, upon which so much depends. Finally labor troubles, imminent or present, suggested caution and held speculation in check.

These labor troubles were more potential in the harm feared than in the harm done. There were a number of them. The most important, as a stock-market influence, was no doubt the strike of the employes of the Brooklyn Rapid Transit Co. There had been for some weeks considerable talk of the possibility of such a strike. The basis for this talk was the existence of a little discontent on one of the newly-acquired lines of the Rapid Transit system. There was an element on the Stock Exchange not averse to seeing a strike. It consisted of speculators who were short of the market and who hoped that such an event would weaken the market all around so that they might cover their ventures at a profit. Whether or not these people were actually instrumental in precipitating the strike, it seems safe to conclude that the slight feeling of discontent which prevailed would hardly have developed into anything serious except for outside encouragement. Early Sunday morning, July 16th, the threat of an attempted strike was actually carried into effect. The step really came as a decided relief. The possibility of such an event had so long been used as an influence to depress values that the fear of its coming hung like a pall over the market, and rendered an improvement out of the question until the issue had been determined one way or another.

The strike was hardly a few hours old before it was seen it must prove a complete failure. Only a small percentage of the employes quit work, and the trouble was largely confined to the lines of the Nassau system, where almost alone any discontent had prevailed. For about a week the company was necessarily embarrassed in the running of cars, and the people of Brooklyn as a consequence suffered considerable inconvenience. But after that the strike simply lapsed, the labor leaders who had taken upon themselves the responsibility of ordering it having in the meanwhile slinked away. There was some attempt at violence, which found its culmination in an effort to blow up a portion of the Elevated structure on Fifth Avenue with dynamite, but a large body of police was sent over from Manhattan, and the New York police maintained their reputation as preservers of the public peace, for which they have become famed the world over, quickly quelling any signs of disorder.

The attempt on July 19th to call out the employes of the Metropolitan Street Railway in Manhattan Borough hardly deserves to be dignified by the name of a strike. Here, too, the possibility of trouble had been heralded on the Stock Exchange for some time. But there appears to have been not even the semblance of a grievance, and the orders of the strike leaders were not obeyed. Some irregularity in the time schedule of the Second Avenue line, lasting hardly more than twenty-four hours, and a few bruised heads along the thoroughfare of that route, testimony to the efficiency of the New York police, constituted the full extent of the disturbance caused.

The other labor troubles of the month also nearly all were of limited importance, being either of only temporary duration or local in their bearing. Such was the strike of the longshoremen and freight handlers at the piers of some of the steam roads in this neighborhood. The strike of the street car employes in Cleveland broke out afresh, and there were some scenes of violence, attributable to the pusillanimity

of the city officials, but law and order finally triumphed. It was found necessary to call out the militia. The expected strike among the tin plate workers did not occur, a settlement having been effected between the employes and the men. The ore smelters' strike in Colorado continued, but a decision of the Supreme Court of Colorado declaring the recently-enacted eight-hour law, out of which the whole trouble arose (the men having demanded ten hours pay for eight hours work), unconstitutional, encouraged the hope that some basis of compromise would be reached between the smelter companies and the men. The ore-handlers' strike at Ashtabula and the brickmakers' strike at Chicago were some of the other similar occurrences.

In the money market all cause for uneasiness did not disappear, but at least a more assuring condition developed. The statement of the Clearing House banks for July 8, showing a contraction of nearly ten million dollars in the money-holdings of the institutions and a reduction in the surplus reserves at one bound from $14,274,550 to $5,062,475, to the lowest point reached since the previous September, had a decidedly disturbing effect. But as soon as it was recognized that these changes in large measure must be due to the heavy interest and dividend disbursements incident to the first of July, and the withdrawals of money which also come at that time, this feeling gradually disappeared, and the statement for the following Saturday proved the correctness of that interpretation. The rest of the month the situation further improved, but the banks were not able to add to their money holdings—the absorption of cash by the Treasury forbade that; the improvement was brought about through a contraction in the loan account, which involved a reduction in the deposit line. From $5,062,475 July 8 the surplus reserve rose to $10,698,750 July 15 and to $12,055,600 July 22, but dropped again to $10,811,125 July 29. The tendency of call loan rates was towards lower figures, but time money was firmer. The record appears in the following.

RATES FOR MONEY IN NEW YORK WEEKLY.

Good 4 to 6 months	4 -5	4½-5½	5 -5½	5 -6

As far as the crops are concerned, the developments were generally very favorable. The weather seemed to be about right both in the Northwest and in the Southwest, promising on the one hand a large spring-wheat crop (notwithstanding some damage from hot winds in limited sections) and on the other a large corn crop. Spring-wheat is now so far advanced towards maturity that the probability of much damage before harvest is rather remote, and the prospect is therefore that the yield will be about as large as that in 1898, when the spring-wheat crop was of unusual proportions. In other words, there will be no material shortage in the spring-wheat yield to be added to the undoubted large shortage in the winter-wheat yield. Not less satisfactory was the progress of the corn crop. Here of course there is still time for an impairment of the present excellent promise, but barring accidents and set-backs the indications are that we shall raise the largest corn crop ever produced in the United States. The outlook is particularly good in Kansas and other States where the winter-wheat crop was short, and where, therefore, there was the most need for a good corn yield.

The stock market was dull until the very close of the month. The street railway strikes had no depressing effect, but served to intensify the dulness. As the month advanced there was a gradual development of strength with a steady appreciation in values, the tone finally becoming very confident. The last few days also there was considerable animation. The improvement was based on the remarkably good reports of railroad earnings received from all parts of the country and on the favorable crop prospects. The Atchison stocks and Missouri Pacific and the Gould Southwestern properties attracted particular attention by reason of the promise of a corn crop of extraordinary dimensions in Kansas and the Southwest.

The foreign exchange market was featureless. There were no further gold exports, beyond the shipment of $250,000 by the National City Bank July 4. Sterling tended towards lower figures the early part of the month, influenced by the high rates for money, but the advance in the Bank of England discount rate and the rise in money in the open market, London, arrested this tendency; later, exchange fell off materially, notwithstanding the money situation abroad.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1899. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Price about January 3, 1899*," were made on that date except those in italics, which are the nearest in January, 1899.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† Assessment paid. § Less than 100 shares. ‡ 1st assessment paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of July*. Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," or endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

Bonds.	Bid.	Ask.	To Net.

† Prices are per share not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

Terms for the CHRONICLE, including the four Supplements above named, are Ten Dollars per year within the United States and Twelve Dollars (which includes postage) in Europe.

WILLIAM B. DANA COMPANY, PUBLISHERS,
PINE ST., CORNER OF PEARL ST., NEW YORK.

REVIEW OF AUGUST.

August was on the whole a quiet, uneventful month in the financial markets. There was steady development in the favorable conditions previously noted. Trade revival remained a prominent and conspicuous feature of the situation, and the activity was reflected in further rises in the prices of various classes of commodities, iron and steel of course leading. The revenues of our great transportation lines furnished further evidences of an extremely satisfactory situation, the gains over the corresponding period of 1898 reaching unusual dimensions. Agricultural prospects continued assuring, and corn gave promise of the largest crop ever raised in the United States. Tension in the money market was for the time being relaxed. The beginning of dividends by the Chesapeake & Ohio RR. and the increase in the dividends on Southern Railway preferred and Union Pacific preferred showed what was in store for security holders under the maintenance of the present favorable state of things. Labor troubles became less prominent, the ore smelters' strike in Colorado being one of the disturbances brought to a close.

The stock market showed much firmness and strength. In some of the better classes of stocks, as also in several of the specialties, there were noteworthy advances. The reasons for the strength are found in the continued activity of trade, in the uninterrupted expansion in railroad earnings disclosed in the weekly and monthly returns, and lastly in the assurance that the corn would rank among the largest, if not as the largest, in the country's history. European purchases of securities were a feature at times, and helped to impart firmness to the market on occasions when bear operators sought to create depression by short sales. Towards the end of the month the acute situation which appeared to be developing in the relations between the Transvaal and Great Britain led to some sales here on European account, inducing temporary weakness, which, however, was readily overcome. The new dividend declarations referred to above were special stimulating influences. Iron and coal shares rose sharply in a number of cases, and Tennessee Coal & Iron touched par on the 21st, closing at 95⅞ on the 31st, against 72 on August 1. "Sugar" common fluctuated rather widely, and closed at 156⅜ on the 31st against 162 at the opening on the 1st, on account of a further cut in the price of sugar and increased bitterness in the strife with the independent refiners. International Paper common experienced a sharp break and dropped to 31 on the 31st on rumors that dividends on the common shares were to be suspended. The close was at 33 on the 31st, which compares with 42¾ at the opening on the 1st. The war between the local gas companies continued unchecked, and the Consolidated Gas Company, after having in June reduced its quarterly dividend from 2 per cent to 1½ per cent, made a further reduction to 1 per cent. The stock nevertheless closed higher, standing 188¾ ex-dividend August 31 against 181 August 1. Brooklyn Rapid Transit suffered a decline on the appearance of the company's annual report for the year ended June 30 1899, but later a more favorable view was taken of the results, and a sharp recovery ensued. The stock opened at 116⅞ on the 1st, dropped to 100¼ on the 22d and closed at 105½ on the 31st.

	1899.	1898.	1897.	1896.
	Bushels.	*Bushels.*	*Bushels.*	*Bushels.*
Month of August.....	72,240,095	47,826,500	274,258,985	86,043,960
January 1 to Aug. 31.....583,513,930		721,015,807	1,038,129,817	719,950,205

The money market developed an easier tendency, but it cannot be said that the actual situation of the

banks changed greatly. From $10,811,125 July 29 the surplus reserve of the Clearing House banks dropped to $8,110,600 August 5, then advanced to $14,395,375 August 12 and $15,082,350 August 19, but dropped again to $12,378,525 August 26. Comparing the money holdings we find the total but slightly larger August 26 than on July 29, it being $226,912,300, against $226,346,800. The improvement in reserve therefore as between these two dates has been due not so much to an addition to the banks' holdings of cash as to the contraction in loans, this in turn helping to draw down the deposits, thus diminishing the reserve requirement. Loans stood at $756,789,900 August 26, against $759,509,100 July 29, and the deposits at $858,135,100, against $862,142,700.

The contraction in both loans and deposits was at one time much heavier, but the last week there was a large expansion in both items (no doubt induced by a feeling, hastily formed but widely prevalent, that there was no occasion for further apprehensions as to the future of money), the loans rising $9,056,000 and the deposits $6,934,100 in that week. In view of the entire situation one would expect to find no very great relaxation in rates, and the record bears out this expectation, the tendency towards ease to which we have referred being observable mainly in the call-loan branch; time loans and commercial paper following to only a small extent. Generally the range for call loans the latter part of the month was 2½@3 per cent, though occasionally there were instances of isolated loans at a higher figure. Time loans on the tenth were quoted at 4@4½ per cent for sixty days and 4½@5 per cent for ninety days to six months. On the 25th the quotations were 4 per cent for sixty to ninety days and 4@4½ per cent for four to six months. On August 31 the latter class of loans ruled about one-half per cent higher. It will be remembered that at the beginning of July quoted rates were still as low as 3 per cent for sixty to ninety days and 3½ per cent for four to seven months. For commercial paper rates at the close of August were at practically the highest figures, notwithstanding considerable out-of-town buying of paper. On August 31 the figures were 4¼@4½ per cent for sixty to ninety-day double names and 4½@5 for prime single names and 5½@6 for good names of the same class. This compares with 3@3½ per cent for double names at the beginning of July, at which time single name prime bills sold at 3½@4 per cent and good at 4@5 per cent. A feature in connection with the somewhat easier feeling which developed was that there was comparatively little discrimination against loans on such of the industrial stocks as have shown reasonable stability, an admixture of these being taken at only one-half of one per cent above the ordinary rates.

It seems proper to make reference here to a few special incidents that had some bearing, direct or indirect, upon the money market. A run July 31 on a number of the Canadian banks, arising out of the failure of the Banque Ville Marie of Montreal the previous week, led to some considerable shipments of gold from this centre to Canada early in August. None of this gold had been returned by the end of August. Perhaps the most important event of the month was the announcement on the 5th by the Secretary of the Treasury, Mr. Gage, that he had decided to resume the issue of gold certificates, which had been suspended since 1893, when the gold in the Treasury first dropped below 100 million dollars. As there has long been a scarcity of small notes and the period was approaching when there would be an active demand for money for crop purposes, the Secretary directed the preparation of $10,000,000 certificates of the denomination of $20. The following Monday (the 7th) the New York banks began to make extensive applications for the gold certificates. Another Treasury move during the month was the making of provision by the Department for the payment by the Assistant Treasurer at New York of drafts drawn by the Superintendent of the Mint at San Francisco. The reason for the step was that Government funds at San Francisco were rather low, having been heavily drawn upon for payments in the Philippines. The effect of the action was to transfer money from San Francisco to New York. The move was rather important in view of the expectation of continued arrivals of gold at San Francisco from the Klondike and Australia.

With reference to foreign exchange, the market had been weak at the close of July, and there was further decline the first day of August and all through the early part of the month, there being liberal offerings of commercial futures. This weakness existed notwithstanding the purchase of £1,000,000 sterling for immediate delivery and £3,000,000 for future delivery, for the purpose of remitting the proceeds of that portion of the Mexican loan subscribed for in the United States. About the 10th of the month the course of the market changed. The Bank of Germany had advanced its discount rate to 5 per cent and there were fears that the Bank of England would also be obliged to raise its rate. Sterling therefore hardened, and the advance continued until the 17th, when it appearing that there was to be no change in the Bank of England minimum, exchange became easier. Thereafter it continued more or less irregular, with renewed ease at the close.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1899. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Price about January 3, 1899*," were made on that date except those in italics, which are the nearest in January, 1899.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† Assessment paid. § Less than 100 shares. ‡ 1st assessment paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of August.* Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," or endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

Bonds.	Bid.	Ask.	To Net.

† Prices are per share not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF SEPTEMBER.

The controlling factors in the financial and security markets during September were the tightness of money and the increasing tension in the relations between Great Britain and the Transvaal. In both directions the situation presented varying aspects from week to week—at times wearing a more assuring look, at others apparently furnishing renewed occasion for anxiety. On the whole, no real, substantial relief from the feeling of apprehension prevailing was experienced in either particular up to the end of the month. On the contrary, the Transvaal difficulty took a decided turn for the worse at the close, and the indications pointed strongly towards an early outbreak of war between the two countries.

The money market was of course the dominant, the immediate influence. But obviously even here the possibility of war in South Africa was a factor whose importance in its bearing upon the future could not be ignored. Aside from the general disturbance in the markets which usually attends the announcement of hostilities, the matter was in this instance complicated by a variety of considerations. With the enormous amounts of English capital invested in South African mining shares and the inability of investors to realize upon such investments except at a heavy loss in the event of war, the question as to the effect upon other classes of investments held by the British public, and whether there would be a further considerable return flow of American securities from abroad, was of considerable importance. Of more moment than anything else, however, was the question of our ability to command gold in the European markets. Substantial relief to our money market must come in large part from gold imports. But with the British supply of gold from South Africa (heretofore such an important item) cut off, and England instead forced to send gold to that point to victual and equip troops, and with the necessity existing on the part of the Bank of England at such a time of keeping its position strong, the difficulty of our obtaining the needed supplies of gold would naturally be greatly increased. Thus the outcome of the Transval situation was of as much consequence from a money-market standpoint as it was in any of its other aspects.

At no time during the month did money market conditions here improve. There were occasions when rates eased off a little, and when as a consequence a more confident feeling developed, but as far as the position of the Clearing-House banks was concerned there was no change for the better. It is true that in one week there was a recovery in the aggregate of the surplus reserve of the associated banks, but this was brought about entirely by a vigorous contraction in the loan account—that is by a curtailment of accommodation to borrowers—a process which, while it may be wholesome in some aspects, could hardly be viewed as very assuring. Indeed all through the month this drastic process of loan contraction went on, and yet the ultimate position of the banks, as already stated, did not improve. The Clearing House statement of September 2d showed a reduction in surplus reserve from $12,378,525 to $9,191,250; September 9th the amount was reduced to $2,458,925, and September 16th saw it down to only $275,450; September 23d there was a recovery to $2,963,700, but September 28th (the 29th and 30th being holidays) there was a drop again to $1,724,450. Loans were decreased $3,126,900 in the week ending September 2d, $6,016,700 in the week ending September 9th, $7,854,400 in the week ending September 16th, $17,866,500 in the week ending the 23d, and $7,752,700 in the week ending the 28th, making no less than $42,617,200 for the five weeks. The deposits fell $8,341,300 September 2d, $15,354,700 September 9th, $15,055,700 September 16th, $20,793,000 September 23d and $13,226,200 September 28th, or altogether $72,770,900 for the five weeks.

Notwithstanding the shrinkage in deposits, however, the money holdings of the banks were drawn down so heavily that the surplus reserve, as already shown, was steadily depleted, and at one time, as we

have seen, almost exhausted. The holdings of gold and legal tenders were diminished $5,272,600 September 2, $10,571,000 September 9, $5,947,400 September 16, $2,510,000 September 23 and $4,545,800 September 28—that is, in the five weeks the loss in the money holdings was but little less than twenty-nine million dollars—in exact figures $28,846,800. With the explanation of this heavy loss of cash by the banks our readers are tolerably familiar, as the facts have been repeatedly set out in the CHRONICLE. There was a large outflow of currency to the interior each week, this reflecting in part the activity of trade all over the United States, but being mainly due to the extra demand incident to the season to move the crops. In addition, Government operations took large amounts out of the market. After increasing its cash holdings $19,148,041 between June 1 and Sept. 1, the Treasury further depleted the supply of cash in the banks to the extent of $3,795,260 during September. This was simply due to revenues in excess of the disbursements, with no means of getting the excess back into the channels of circulation. The Secretary of the Treasury, to be sure, began the pre-payment of the October interest on the Government debt (on the coupon bonds Sept. 18 and on the registered bonds Sept. 21), but this did not suffice to check the growing accumulations.

Very naturally, under such a state of things, money rates kept advancing, and ruled higher than for a very long time past. Six per cent on call at the Stock Exchange was reached very early in the month; in the week ending the 15th some loans were made as high as 9 per cent; in the week ending the 22d as high as 10 per cent; while in the last week some borrowers had to pay 20 per cent, and 12@15 per cent were not uncommon figures. The weekly average on call loans steadily advanced. For the week ending on the 1st it was still as low as 3⅛ per cent, the next week it went up to 5 per cent, the following week to 6 per cent, in the week ending the 22nd to 6½ per cent, while the last week the average was fully 8 per cent. Time loans rose to full 6 per cent for all periods.

The only prospect of relief in sight came from the possibility of gold imports. Some gold engagements on the other side for shipment to New York were announced the latter part of the month. This calls attention to the course of our foreign exchange market. On the 21st the cable reported that bankers in London admitted that £100,000 in bar gold had been purchased in the open market. The next week $2,350,000 more gold was reported taken in London for export to the United States. As is usually the case with the beginning of such a movement, doubts were expressed as to whether the first engagements were justified as regular exchange operations. The continuance of the movement and the further drop in exchange afforded the best evidence of the nature of the transactions. As a matter of fact as money rates advanced to the extreme figures noted above, the money market completely dominated the course of foreign exchange. The Bank of England did not make any advance in its discount rate, which remained at 3½ per cent, but in the open market the rate ruled at 4 per cent at the close. [On Tuesday of this week (Oct. 3) the rate was raised to 4½ per cent.] The tendency of sterling was almost uninterruptedly downward throughout the month. As money here became increasingly dear, there were free offerings of sixty day bills against sterling loans, and there were also sales of demand bills and cable transfers, the proceeds of which were loaned here.

The stock market naturally was more or less depressed under the growing stringency in money—in truth it was at times pretty badly demoralized. The standard stocks, however, as a rule held up remarkably well. The weak features were the industrial shares and other specialties like the local traction stocks. Among the latter Brooklyn Rapid Transit sold down from 107½ on the 6th to 75½ on the 20th, Metropolitan Street Railway from 211¾ on the 6th to 187½ on the 18th. Among the industrial shares American Ice common and preferred, American Malting common, Consolidated Ice preferred, Glucose Sugar Refining preferred, International Paper common and preferred, Knickerbocker Ice (Chic.) com., National Lead pref., and Republic Iron & Steel preferred, all sold at the lowest points of the year. In many cases considerable recovery occurred towards the close. United States Flour Milling, a new candidate for favor, which was placed on the list during the month, had a sensational break, and the common, on comparatively few transactions, dropped from 58¼ on the 15th to 24 on the 20th. The reason assigned for the break was that inside support had been withdrawn. The death of Cornelius Vanderbilt had comparatively little influence on the stocks of the Vanderbilt roads. The failure of the St. Paul Company to increase its dividend had an adverse effect on some of the granger shares.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1899. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Price about January 3, 1899*," were made on that date except those in italics, which are the nearest in January, 1899.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† Assessment paid. § Less than 100 shares. ‡ 1st assessment paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of September*. Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

Bonds.	Bid.	Ask.	To Net.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF OCTOBER.

The month of October was marked by a series of important incidents which exercised a far reaching and (for the moment) widely disturbing influence in the financial markets. The long existing tension in the relations between the Transvaal and Great Britain was broken and an outbreak of war between the two countries occurred. At the same time the great European banks took action indicative of a state of things which necessitated unusual measures in preparation for possible developments or contingencies.

On Tuesday the 3d the Bank of England suddenly advanced its minimum rate of discount from 3½ to 4½ per cent. A change in the rate on any except the regular weekly meetings on Thursdays was in itself evidence of an exceptional situation, rendering delay inadvisable. But as it happened, when the regular weekly court was held, the governors still further advanced the rate one-half of one per cent, bringing discounts up to 5 per cent, so that we had the almost unprecedented occurrence of two advances in a single week. On the 3d, too, the Imperial Bank of Germany raised its rate from 5 to 6 per cent, and on the 4th the Bank of the Netherlands put up its rate from 4½ to 5 per cent. The Bank of England statement on the 5th showed a loss in bullion of £1,899,778, or over nine million dollars. The next week came the outbreak of war between the South African Republic and Great Britain. The war was precipitated by the act of the Transvaal, which put itself in the unfortunate position of presenting an ultimatum to the British Government. This was on the 10th. On the 11th the English Government having declined to reply to the ultimatum, and the twenty-four hours time limit fixed in it having expired, hostilities began, the Boers taking the offensive.

The rise in money rates abroad, aside from its effect in financial circles generally, was of decided importance in its influence on our foreign exchange market. For the moment high money rates in Europe became more potential than the exceptional rates here. New York exchange on London moved up, and the possibility of an outflow of gold to Europe was seriously discussed. The change in this aspect of the situation was sudden as well as startling, for the latter part of the previous month gold imports to the United States, as will be remembered, were still in progress. Fortunately, no gold was taken on this side for shipment, and after the 19th sterling exchange declined.

Our money market of course continued a matter of deep concern, all the more so because of these momentous developments abroad. Call money after the first week declined from the extreme high figures reached at the beginning of the month, but this was not due to any real change in the money situation. The decline reflected in the main the development of a feeling of greater assurance with reference to those special disturbing influences enumerated above, which early in the month had so seriously affected all the financial markets. It was in the presence of these special adverse influences that call loans at the Stock Exchange touched 35 and 40 per cent the first week of the month, or the highest figures reached in three years. When it was seen that there were no further serious disturbances abroad, anxiety here was in a measure relieved, and the better feeling very naturally was reflected in some relaxation in money rates. But that there had been no change in the underlying conditions controlling the money market was made evident when on Monday, the 30th, call loans on the Exchange again touched 35 per cent.

It deserves to be noted that the exceptional figure of 40 per cent reached on the 3d seems to have been the result of manipulation. The previous day, however (October 2d), call loans touched 35 per cent without apparently any resort to artifices, showing the urgency of the demand. The matter of manipulation on the 3d, though, calls for brief mention because it led to the adoption of a resolution by the governors of the New York Stock Exchange intended to prevent or punish occurrences of that kind in the future. It

appears (according to the allegations) that during the last hour of business on Tuesday October 3d a broker urgently bid for money on the floor of the Exchange, forcing the rate up from 20 to 40 per cent, that then he did not take the money, but settled with the lender by paying the interest on the loan without using the money at all. The attention of the governors of the Stock Exchange having been called to the character of this transaction, they made an investigation, with the result that on October 25 a resolution was adopted declaring that the simple payment of interest by the borrower to the lender after 3 o'clock P. M. without actually effecting or properly endeavoring to effect a loan, may be held to be an evasion of the contract and an act detrimental to the interest and welfare of the Exchange, punishable by suspension or expulsion from the Exchange.

Supplies of money in the banks here did not increase. On the contrary, the money holdings of the Clearing-House institutions underwent further contraction, being reported (specie and legal tenders combined) October 28th only $193,447,400, against $198,065,500 September 28th. Nevertheless, the banks increased their surplus reserves. The improvement was brought about by further vigorous contraction of the loan account, thus diminishing their deposit liability. In the statement of October 7th a drop in the surplus reserves from $1,724,450 to $643,200 was reported, but after that there was steady augmentation, the surplus rising to $1,177,350 October 14th, to $1,441,075 October 21st and to $3,038,525 October 28th. As already stated, this improvement was effected through the reduction of outstanding loans and discounts, the total of these being only $695,777,000 October 28th, against $714,172,700 September 28th, and against $793,852,900 July 8th, the high point of the year. The deposits were reduced from $785,364,200 September 28th to $761,635,500 October 28th. On June 24 the deposits stood at $909,004,800 (on March 4 the amount was still larger, at $914,810,300), showing a reduction in the interval of 147⅓ million dollars.

The banks lost money through the continued shipments to the interior in excess of the receipts, and this loss was offset only in part by the arrivals of gold from Europe, these arrivals having been small because, as stated above, the flow of gold this way was checked and the current almost reversed. The U. S. Treasury made a special effort to return to the channels of circulation a portion of its steadily accumulating hoards, but not a very great measure of success attended the effort. On the 10th the Treasury Department issued a circular announcing that the "interest maturing on the several interest dates between and including Nov. 1 1899 and July 1 1900 on the registered and coupon bonds of the United States" would be prepaid, "with a rebate of two-tenths of one per cent per month on the amount prepaid." Prepayment was to begin October 16 and no rebate was to be exacted for the month of October. Checks for the interest due November 1 were to be mailed October 25. Up to October 31 only $$383,933 of interest not due November 1 had been prepaid at the New York Sub-Treasury.

We have sketched above the influences affecting the course of foreign exchange during the month. On the 2d (the first business day of the month) rates for actual business opened at a decline of one-quarter of a cent for long, and a rise of half a cent in sight bills and cable transfers. The tendency of the market was upward, and the widening of the difference between the two classes of bills represented simply conformity to the higher discount rates abroad. The next few days, as discounts became still dearer in Europe, there were some further changes of the same kind (60-day bills declining while sight and cable transfers advanced), but thereafter all three classes of bills kept steadily rising. When the money strain abroad was most acute there was a disinclination to draw bills here, and the making of loan bills of course was entirely suspended. Rates reached their highest point on the 19th. After that the market eased off.

The stock market was naturally weak the early part of the month, when the news from the other side was so disturbing. But the latter part, as domestic conditions began to assert their sway, the tone decidedly improved. The activity of general trade, the large railroad earnings, and the efforts making to obtain higher rates for the transportation services of the carriers, all combined to induce active buying of railroad shares, under which a sharp and pretty general advance in prices occurred. Many of the industrial shares, however, remained weak throughout, being looked upon with suspicion. The gain in the surplus reserves of the banks on October 28 acted as a further stimulus towards the close, but the renewed advance in money rates on the 30th tended to restrain speculation.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1899. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Price about January 3, 1899*," were made on that date except those in italics, which are the nearest in January, 1899.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

Boston Stock Exchange.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† Assessment paid. § Less than 100 shares. ‡ 1st assessment paid.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of October*. Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given*. The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which reqnire payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

† Prices are per share not per cent. ‡ Sale price. x Ex-dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF NOVEMBER.

The money market continued the absorbing topic and the controlling influence in financial circles during November. Less attention than usual was paid to the November elections, since in most cases these were either distinctively local or complicated by local issues. The result therefore was considered as possessing little significance. It remains to be said that of the two States in which the campaign was conducted with especial vigor, the Administration party triumphed in Ohio, while in Nebraska Bryan's personal popularity sufficed to keep the State in the opposition column.

The action of the Secretary of the Treasury in coming to the relief of the money market was the event of greatest importance during the month. The course of the Treasury Department the previous month in offering to prepay (but with a rebate) the interest on United States bonds for the period up to July 1 1900 proved of no avail in drawing down the Treasury accumulations of cash, since very few bondholders accepted the offer. This expedient having failed, opinion was divided as to the advisability of the Secretary having recourse to the purchase of bonds in the effort to reduce the Government's large holdings. Some parties maintained that the situation was not sufficiently urgent to warrant such a step, and that more harm than good might result from it. But others contended that for the Government to continue to take money out of the market, without any effort to disburse it, must under the prevailing conditions serve greatly to intensify the existing stringency and possibly in the end lead to disaster, for which the Secretary would then be held responsible.

While the discussion was going on Secretary Gage rather suddenly and quite unexpectedly announced his readiness to purchase any part or all of $25,000,000 in Government bonds of the 4 per cent funded loan of 1907 or the 5 per cent loan of 1904. This announcement was made after the close of business on the 15th, so did not become generally known until the next day, the 16th. The Treasury circular stated that the 4 per cents would be purchased at 112·75 per cent and accrued interest and the 5 per cents at 111 and interest, these being the current market prices at the time. The proviso was added that tenders must be made on or before the 30th of November. After the issue of the circular discussion concerned itself chiefly with the question whether the offer would bring out the full supply of bonds, the best opinion being that it would; but this view did not prove entirely correct. On Thursday the 16th payments for bonds purchased at the New York Sub Treasury were $3,269,298 56, and on Friday the 17th they were $2,081,821 01, making $5,351,119 57 for the two days; for the week ending the 24th there were further payments at this point of $6,711,137 88; and for the whole of the month to and including the 30th the aggregate of the payments was $16,496,100 09, this including premium and interest, as well as the principal of the bonds bought.

It is hardly necessary to say that these additions to market supplies operated greatly to improve the position of the New York Clearing House banks. At the beginning of the month the condition of these institutions, as indicated by their weekly returns, was strained. The statement for Saturday, October 28, had shown a surplus reserve of $3,038,525, or an increase of $1,597,450 as compared with the week preceding. These figures were considered inexplicable at the time, and it subsequently appeared that through an error of one of the banks, rather tardily admitted, the surplus had been reported a million dollars too large. Saturday, the 4th of November, found the banks $338,350 below the legal limit of reserve, and by the 11th the deficiency had increased to $2,788,950—this notwithstanding continued contraction in loans, involving necessarily a diminution in the deposit liabilities.

The situation was thus rather urgent when the Secretary of the Treasury determined upon the purchase of bonds—a fact which was also indicated by the circumstance that the next week, before the Sec-

retary invited tenders of bonds, transactions in time loans were reported at 6 per cent plus a commission of ¼ of 1 per cent. Under the system of averages practiced in making the weekly bank returns, the bond purchases of the 16th and 17th were reflected only in part in the statement of the 18th, which nevertheless showed considerable improvement, the deficiency below the 25 per cent limit of reserve having been reduced to $312,025. By Saturday the 25th of course the Treasury payments had worked a great change, and the statement for that day brought the banks at one bound $6,652,200 above the 25 per cent requirement. It deserves to be stated, as indicating the difficulty of borrowers in obtaining accommodations, that all through the month, even in this last week, the banks steadily contracted the total of their outstanding loans. The week ending the 4th the diminution in loans was $240,900, the next week $7,151,100, the following week $8,622,800, and the week ending the 25th $3,125,800. This was quite 19 millions for the four weeks, bringing the total of the loans on the 25th down to $676,636,400, against $695,777,000 October 28th and as against $793,852,900 on the 8th of last July, the high point of the year. It will be observed that as compared with this latter total the reduction has been one hundred and seventeen million dollars. For the deposits the aggregate was $737,958,000 November 25, which compares with $761,635,500 October 28th, $909,004,800 June 24th and $914,810,300 March 4th, the high point for that item. It deserves to be noted that as far as the money holdings are concerned, these were smaller November 25, notwithstanding the additions through the Treasury bond payments, than on October 28th; that is the gain November 18th ($485,900) and November 25 ($7,244,500), was not sufficient to offset the losses the first two weeks, which amounted to over 10 million dollars; hence these money holdings were but $191,141,700 November 25, against $193,447,400 October 28th. The interior movement of currency continued adverse to this centre, until the last week, when the current turned slightly in favor of New York.

The call loan branch of the market worked appreciably easier after the issue of the Treasury bond circular the middle of the month. The first of November some loans on the Stock Exchange were recorded as high as 20 per cent. On the 29th (the 30th being Thanksgivings) the highest figure was 8 per cent. The following gives the record by weeks for all classes of loans:

Our foreign exchange market has been somewhat irregular, influenced largely by the state of the money market. After fractional advances at the beginning of the month, the market became decidedly weak and experienced a sharp break under the high rates ruling for money here. By the 13th sterling got down to a figure where there was talk of possible gold imports. The money situation here encouraged sterling loans, and the covering of previous sales of bills was deferred. The market had begun to show an upward reaction, when on the 16th the announcement of Secretary Gage's intention to buy bonds caused a very sharp rise, and for the time being gave a decided upward tendency to rates. Later the market weakened again, owing to the continued firmness of money, the negotiation of further sterling loans, and pretty liberal supplies of bills against grain and cotton shipments, and also a supply of drafts against purchases of American stocks for European account. This downward movement was in face of high discounts abroad at all the European centres. The last few days there was an upward reaction in exchange.

Speculation on the Stock Exchange showed widening activity and growing strength the latter part of the month when the Treasury bond purchases gave promise of a less strained monetary situation. The early part of the month business was rather neglected, and the tendency of prices irregular and in some instances downward, though there was even then no pronounced weakness; the continued activity of trade and the good returns of railroad earnings were sustaining influences which even dear money could not overcome. The last ten days the entire market developed strength, though upward movements in special stocks like Baltimore & Ohio, Cleveland Cincinnati Chicago & St. Louis, Southern Pacific, Union Pacific, &c., were the main features. It was supposed the action of the New Amsterdam Gas Company on the 23d in announcing its intention to advance the price of gas would settle the local gas war, but this proved not to be the case, as the other gas companies declined to be governed by the action of that company.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1899. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "*Price about January 3, 1899*," were made on that date except those in italics, which are the nearest in January, 1899.

☞ *For foot notes to tables see last page of Bonds and last page of Stocks.*

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

☞ *In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.*

† Assessment paid. § Less than 100 shares. ‡ Before payment of assessment.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the *last day of November*. Of course the coupon, is there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest *in addition to the price given* The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.,' for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

☞**Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. *In all other cases accrued interest must be added to the price.*

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

Bonds.	Bid.	Ask.	To Net.

† Prices are per share not per cent. ‡ Sale price. x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.
